

eKEY MANAGER

DELIVERING QUALITY KEY MANAGEMENT SOLUTIONS SINCE 2000...

The image features a central vertical timeline with the following steps: STRATEGY, STEP1, STEP2, STEP3, STEP4, STEP5, and STEP6. To the right of this timeline, there are several data visualization elements: a line graph labeled 'PEAN', a bar chart, a line graph labeled 'STEP2', a bar chart, and a large bar chart at the bottom. The background is a blurred image of a person in a dark suit, overlaid with a grid and various digital icons. The central text reads: **TRACEABILITY THROUGH INTELLIGENT MANAGEMENT SYSTEMS**. At the bottom right, there is a grid of icons including a person, a magnifying glass, a padlock, a gear, a line graph, a bar chart, and a building.

e-Keymanager Pty Ltd, formerly trading as Autotag Australia Pty Ltd, has been in business for over 20 years during which time, has maintained a loyal customer base, repeatedly buying our key and asset management systems and associated products. We are the sole distributor of products from Keytracker UK and Eichner (Germany), companies that have agents and distributors throughout the world.

We supply industry with key and asset management systems, from the very basic Mechanical Key Management system to the more sophisticated Electronic Key and Asset Management cabinets and locker systems. We also supply warehouse management systems.

Our clients include companies from the Auto industry, Mining, Real Estate, Government both local and federal, Fleet, and long-distance carriers, Security, Hospitality and many more. In fact, any company or organization where the management of keys and/or assets is essential to their wellbeing.

What Our Clients Say About Us...

"We are very pleased with the new system, it provides 100% better key management and is great to identify who has which keys. The service we got from your team was great, they were helpful and took the time to understand what we needed"

Graham Cann, Mechanical Key System.

"Since having the system installed across our sites, we have seen a decrease in time spent finding the correct keys for a building or area and have full visibility of who has accessed the keys, at what time and for how long."

Andrew Howarth, Electronic Key System.

MAGNETIC NUMBER BLOCK SYSTEM

The Magnetic Number Block System is predominantly used by the automotive industry, especially in an often crowded workshop floor, by providing vehicle identification where the number block adheres to the roof's highest visible point.

The system consists of the **Magnetic Number Blocks** which are fitted with powerful magnets inside the fixed rubber base and are numbered to match the **Block Control Board** which keeps track of the Number Blocks when not in use. The Board holds 20 blocks. Number Blocks may be purchased separate from the Block Control Board, come either numbered or blank and in any colour or mix of colours.

The blocks may also be personalised for use in any industry.

Product Name	Product Code	Price
Blocks Blank (Minimum order 10)	BNBO	\$19.95 each plus \$24.95 shipping plus GST
Blocks Numbered (Minimum order 10)	BNBN	\$21.95 each plus \$24.95 shipping plus GST
Block Number System (Block Control Board plus 20 Number Blocks)	BNBB	\$625 plus shipping at cost plus GST
Personalised Number Blocks (Minimum 20 blocks)	BNBP	\$120 one-time set-up, thereafter \$21.95 per block plus \$24.95 shipping plus GST

Key Management Made Simple with:

KEY TRACKER®

THE SECURE KEY MANAGEMENT SYSTEM

The KEYTRACKER system is the simplest and most cost effective system currently available for keeping track of where keys are and who is using them. This means saving time, money and minimising frustration.

The KEYTRACKER Key Management system is ideal for businesses where lots of keys are handled by lots of staff, where the incidence of lost keys is high.

It works on the basis of a colour coded identification system where keys are secured to a numbered Retention Peg by an Anti-tamper Seal which is then locked into the board. Keys can only be released from the board with a coloured Access Peg. Each employee has their own Access Peg/s which can be listed on a simple reference sheet and in so doing identifies who has taken the key.

Getting a key is as easy as 1 2 3

1 Insert your personal colour coded access peg...

2 Twist to release the desired key...

3 Remove key!
Access peg cannot be removed until key is returned

To order or for more information
call: 1800 830 367 or email: sales@ekeymanager.com.au

The Benefits are Simple...

SAVES TIME...

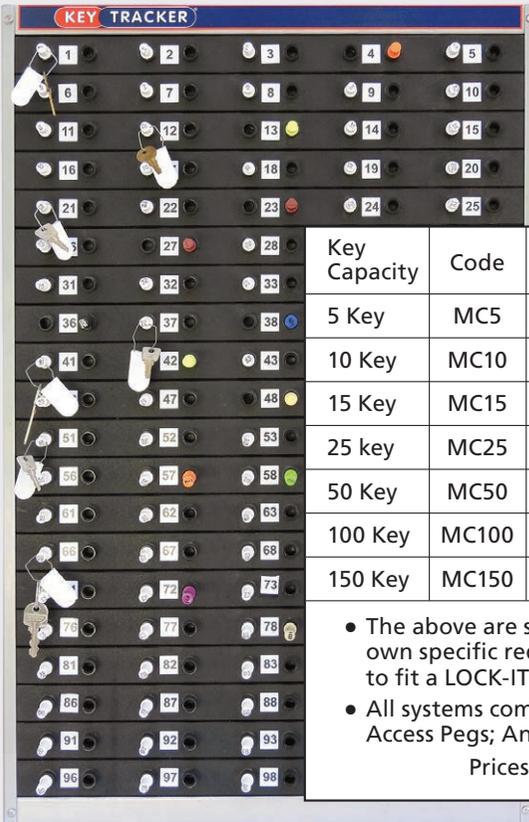

- No more lost keys
- Only authorised staff can access the board
- Organised layout – all keys in one place

SECURITY...

- Ensures you always know who has the keys
- Minimises opportunist theft
- Rugged construction deters vandalism

PRODUCT...

- Totally power free, no connection, license fee, training or maintenance contract

EXTRAS & SPARES

- Spacer tracks (double board size)
- Stainless Steel 'Holding' bar
- Keytracker colour coded padlocks
- Padlock storage bars
- Slide off wall mounts

See next page for a specially adapted peg board to fit a LOCK-IT key cabinet together with other cabinets designed to hold these mechanical peg boards.

Key Capacity	Code	Height mm	Depth mm	Width mm	Weight kg	Price
5 Key	MC5	101	70	153	1.36	\$275
10 Key	MC10	140	101	546	1.72	\$395
15 Key	MC15	175	101	546	1.87	\$545
25 key	MC25	254	101	546	3.63	\$695
50 Key	MC50	440	101	546	5.44	\$975
100 Key	MC100	821	101	546	11.34	\$1595
150 Key	MC150	1211	101	546	14.52	\$1995

- The above are standard sizes but can be built to your own specific requirements. See page 6 for an adaptation to fit a LOCK-IT Key cabinet.
- All systems come complete with Retention Pegs; Access Pegs; Anti-tamper Seals and Seal Cutter

BESPOKE SYSTEMS

Special adaptation of a Mechanical Peg Board to fit a LOCK-IT Key Cabinet

Lost keys and the high cost of replacement or wasted time looking for them can be a nightmare, but it can be something of the past with the installation of a bespoke Keytracker Mechanical Peg Board.

One of our clients, a Mercedes Dealership, found that despite the security their LOCK-IT key cabinet provided, it had no control of who had the keys, did they have the authority to take them but worst of all, keys for these expensive vehicles being lost.

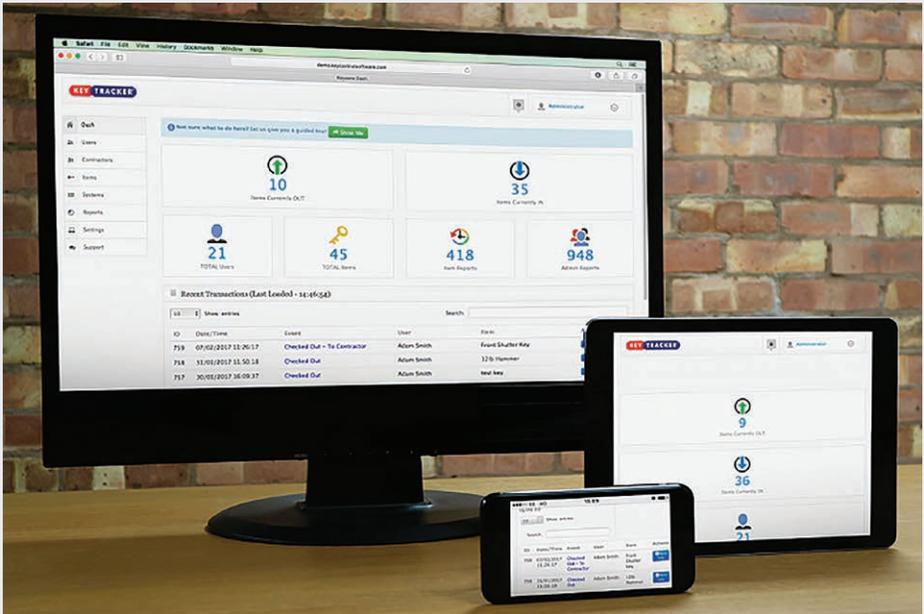

This led to the installation of 5 specially adapted Mechanical Peg Boards to fit their LOCK-IT cabinets, with each board holding 54 keys to manage the movement of keys throughout all areas of the Dealership, from receipt of new vehicles through service and on to the sales floor.

Works just the same as the LOCK-IT leaf

Product Code: MC54, Number of keys held: 54
Price per Board: **\$1145** plus shipping at cost plus GST

Our key tracking software is designed to track keys as they are checked in and out of the system, even when taken between sites. You may also use this software to track and manage any barcoded items.

Multiple users can log into the software through any compatible internet browser from any device, including smartphones and tablets.

Administrators have complete control over individual and group access permissions. You can decide who has access to specific keys or barcoded items. You can even decide what users can do when logged on to the software.

The software may be used as a standalone product or with any of our other Keytracker systems.

Contact us today to enquire about a 30 day no obligation trial.

The Keytracker Mechanical Key Management system (pages 4/5) paired with key tracking software, provides a comprehensive method for managing, tracking and controlling your keys and or assets.

With our web-based software, you can easily track key movements in real-time. Monitor your staff and keys through a simple user interface and avoid the challenges of dealing with a lot of keys.

T1 KEY OR TOOL MANAGEMENT

Following the Peg-in; Peg-out concept of the Mechanical Key Management System, the T1 Unit provides a simple solution for storing, securing and keeping track of a single key or tools and other equipment.

Secured using any one of our tamper-proof security seals range, the keys, tools or equipment are locked onto a Retention Peg which is locked onto the T1 unit. Staff must use their unique Access Peg to release the item, which stays locked in its position when the item is removed.

At a glance, management or staff can quickly and easily see which equipment is in use and by whom, whilst ensuring fast return to its correct position. Please refer to the Keytracker Mechanical Key Management system (page 4) to see how this peg-in, peg-out system works.

For heavier items such as tools and drills, ladders etc., a metal cover is provided to support the extra weight of the item.

Product Code	Product Description	Price*
T101	Single Keytracker Unit including Retention Peg, 2 Access Pegs and 5 Anti-tamper Seals. Ideal for Keys only.	\$48.95

e-Track Ltd, a trusted supplier of Intelligent Management Systems for sector leading businesses.

e20 Key System

e50 Key System

e100 Key System

e200 Key System

Through a due diligent employment strategy, e-Track has carefully assembled experienced teams of engineering software development and project delivery experts to provide solutions that fit within the requirements of the operational business leaders of today.

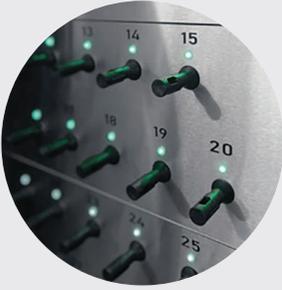

We design from concept through prototyping to production solutions that deliver our clients the tools from which they can manage business critical assets and their operatives. And as an innovative business, our hardware and software design teams work efficiently along our internal business road maps to deliver ever improving systems that exceed client expectations, allowing us too keep ahead of the competition.

e-Track Web is an easy-to-use software application for controlling access to intelligent Key Management Systems. Through system analytics, key and user data can be utilised to diagnose areas of inefficiencies and subsequently improve business operations where keys are handled and cabinets are strategically positioned.

Our Key Management Systems are modular and designed to fit within specific site requirements. They can be operated from a single main controller with a touchscreen or keypad and can be assembled together with up to 14 connected extension cabinets.

Multi-Coloured LEDs

RFID Detection

High Secure Locks

Off Set Key Positions

Intelligent Access

Numbered e-Fobs

FEATURES

- Multi colour LED withdrawal and return indicators
- RFID e-Fob detection
- Modular design allowing for future expansion
- Off set key positions for maximum hanging space
- Magnetic locks with sensory state detection
- Battery back-up as standard
- Additional UPS enclosures for prolonged isolated usage
- Mechanical key override
- 7" capacitive touchscreen
- Multispectral imaging fingerprint readers
- Integrated camera
- Integrated access control reader
- 2-way audio
- 10mm polycarbonate doors
- 1.5mm steel construction
- Flexible API for 3rd party software integration
- Easy maintenance and service
- High secure locks available
- Sector specific software modules
- Mobile responsive web app
- Mobile app
- Data tracking and graphical reporting
- Interactive accessory ordering and stock control
- Easy to use software

Intelligent Electronic Lockers

SMART, SECURE & EFFECTIVE...

Install Keytracker's affordable Drop-Off and Collection lockers within your business, to open-up additional opportunities whilst also creating contactless service to keep customers and staff safe.

- Install this simple and easy to use IP65 Locker solution to accommodate 24/7 key and other items drop off and collection.
- Open up your business to customers who cannot attend during standard working hours.
- Remove unnecessary human interaction wherever possible to keep your customers and team safe.
- Drastically reduce waiting time, customer dwell time, service department overheads and required service areas.
- Rapidly and effectively increase your bottom line and profitability whilst driving business forward.
- Use the touchscreen or web software for total administrator control and reporting.
- Remotely monitor the system status and Locker availability, managing drop off and collection times for an unbeatable customer experience.

FEATURES:

- Double skinned steel fabrication.
- Weather-proof construction and IP65 rated screen.
- HD colour camera for usage recording and QR code scanning for hands free use.
- Generate unique pin codes for each locker, or assign a random code which is automatically emailed.
- Ultra-secure design with concealed hinges and slam latch locking mechanism.
- Manual door override option for emergencies.
- Easy to sanitise for germ free use.
- Each locker compartment measures W140mm x H110mm x D200mm available in 4, 10 or 20 doors.

INTELLIGENT ELECTRONIC LOCKERS

Along with our Drop-Off and Collection Lockers and based on the same functionality, **Keytracker** offers advanced solutions to Business Asset Loans.

Used for the automated management, storage and charging of important equipment, our locker systems enhance security and improve workplace efficiency, whilst also reducing theft, damage and loss.

Incorporating touchscreen control or web software to enable greater management and reporting where required, intelligent lockers also deliver a simple and easy-to-use user experience.

Using advanced software, each system can be configured in a range of different key modes to suit the individual requirements of each organisation, providing solutions to a variety of challenges...

Business Asset Loans provide greater control over the devices and equipment essential to an organisation's effective operation. Not only automating access to users collecting or returning items, the systems allow admin to track assets in real-time and generate reports when needed.

Personal Item Storage Mode offers staff, students, or visitors a self-service storage location where personal items such as mobile phones, laptops, and other valuables can be securely stored and recharged for short periods of time, helping to boost productivity whilst offering peace of mind.

Operating 24/7, 365 days a year, **Keytracker** intelligent locker systems are relied upon by a wide range of organisations across the world, from schools, colleges and universities, to logistics companies, hospitals and the emergency services.

Wherever there is a pool of assets which need to be accessed by numerous approved users, **Keytracker** electronic lockers can be installed to provide the optimum management solution.

Locker compartments and locker sizes are bespoke.

Structure Your Workflow with Sturdy and Simple Cascading Racks

Increase operational capabilities by improving productivity with this simple and visually structured work processing system.

Easy as 1, 2, 3, 4. Simply choose the number of racks for the number of staff, the colour and number of columns required to cover the number of planning days and attach to the wall with the base module supplied.

The beauty of the system is you can tailor it to your exact requirements. For example, you may have 5 staff working 5 days a week so 5 modules down, times 5 rows across. It can also be colour coded to create a universal look or each colour allocated to a User, a department or task.

These strong but lightweight ABS Plastic moulded planner racks (think Lego toys) come in 2 different sizes. 'Large' for the storage of A4 Service Boards and 'Thin' ideal for A4 paper.

The storage racks are available in 5 different colours (Blue, Red, Green, Yellow and Grey) with dimensions: Large 302 x 262 x 42mm. Thin: 302 x 240 x 15mm.

The perfect basic-equipment for SCHEDULING and PLANNING daily processes in your Workshop...

Our Workshop planning boards are in high quality, tough and easy care design, made from polypropylene with reinforced plastic profile and stable back. *Service Boards not included, see next page for details.*

The board elements exhibit modern design and classic colours, with the rail system catering for A4 service boards which provide a 96mm viewing edge, 210mm insertion depth. The rails hold 5 service boards comfortably, though can be overlapped to hold more if required.

Product Code	Number of Rails	Size	Price
WPB07	6	W: 1575 x H: 900mm	\$1170 plus shipping at cost plus GST
WPB08	10	W: 1575 x H: 1285mm	\$1390 plus shipping at cost plus GST
